

Thomas Ford

Senior DevOps & Software Engineer

Address: Lubbock, TX 79403

Phone: +1 (557) 222-8311

Email: thomasford3344@gmail.com

Senior DevOps and Software Engineer with **8+ years** of experience building scalable cloud infrastructure, automating deployments, and developing reliable backend systems. Skilled in Kubernetes, GCP, Bitbucket, Jira, Python, and Java, with a strong track record of supporting intelligent, data-driven platforms like OPTRIX and contributing to next-gen cybersecurity products at RevBits. Adept at improving delivery pipelines, optimizing system performance, and collaborating across teams to deliver secure, high-quality software. Known for clear communication, fast problem-solving, and driving efficiency in fast-paced, complex environments.

Work History

Apr 2020 **DevOps Engineer**

- Nov 2025 *Vieaura Inc, Alpharetta, GA*

- Built CI/CD pipelines in Bitbucket to support OPTRIX's operational intelligence, ensuring reliable, repeatable deployments.
- Managed scalable Kubernetes clusters on GCP, delivering high availability for OPTRIX's real-time spatial awareness features.
- Set up monitoring, logging, and automated deployments on GCP to support OPTRIX's adaptive Intelligent Guidance system.
- Improved workflows by refining Jira processes, automating infrastructure tasks, and standardizing environments for the OPTRIX no-code platform.

May 2018 **Software Engineer**

- Mar 2020 *RevBits LLC, Mineola, NY*

- Developed security product features in Python and Java for platforms including RevBits CIP/XDR, Email Security, EDR, and Zero Trust.
- Built and optimized backend components to improve threat detection, access control, and incident response.
- Translated penetration-testing and vulnerability findings into product enhancements.
- Performed code reviews, debugging, and testing to ensure secure and reliable software.

Apr 2017 **Full Stack Software Developer**

- May 2018 *EBQ, Austin, TX*

- Developed backend systems using Java and Python to support core website

functionality and internal business workflows.

- Designed and implemented RESTful APIs and database structures for dynamic content and efficient data processing.
- Integrated backend services with internal tools and systems to improve operational efficiency and data flow.
- Collaborated with designers and stakeholders to deliver new features, resolve issues, and optimize system performance.

Education

Mar 2017 **Bachelor of Engineering:**
Computer Science
Texas A&M University

Skills

Teamwork and collaboration

Problem-solving

Scripting languages

Monitoring and logging

Infrastructure automation

Configuration management

Continuous integration

Continuous deployment

Software testing

Version control systems

Software development

Cloud computing
