

THOMAS FORD

SENIOR DEVOPS & SOFTWARE ENGINEER

Lubbock, TX 79403 • (254) 262-5719 • thomasford3344@gmail.com • **WWW:** thomas-fords.vercel.app

Professional Summary

Senior DevOps and Software Engineer with **8+ years** of experience building scalable cloud infrastructure, automating deployments, and developing reliable backend systems. Skilled in Kubernetes, GCP, Bitbucket, Jira, Python, and Java, with a strong track record of supporting intelligent, data-driven platforms like OPTRIX and contributing to next-gen cybersecurity products at RevBits. Adept at improving delivery pipelines, optimizing system performance, and collaborating across teams to deliver secure, high-quality software. Known for clear communication, fast problem-solving, and driving efficiency in fast-paced, complex environments.

Work History

DevOps Engineer, 04/2020 to 11/2025

Vieaura Inc. – Alpharetta, GA

- Built CI/CD pipelines in Bitbucket to support OPTRIX's Operational Intelligence, ensuring reliable, repeatable deployments.
- Managed scalable Kubernetes clusters on GCP, delivering high availability for OPTRIX's real-time spatial awareness features.
- Set up monitoring, logging, and automated deployments on GCP to support OPTRIX's adaptive Intelligent Guidance system.
- Improved workflows by refining Jira processes, automating infrastructure tasks, and standardizing environments for the OPTRIX no-code platform.

Software Engineer, 05/2018 to 03/2020

RevBits LLC – Mineola, NY

- Developed security product features in Python and Java for platforms including RevBits CIP/XDR, Email Security, EDR, and Zero Trust.
- Built and optimized backend components to improve threat detection, access control, and incident response.
- Translated penetration-testing and vulnerability findings into product enhancements.
- Performed code reviews, debugging, and testing to ensure secure and reliable software.

Full Stack Software Developer, 04/2017 to 05/2018

EBQ – Austin, TX

- Developed backend systems using Java and Python to support core website functionality and internal business workflows.
- Designed and implemented RESTful APIs and database structures for dynamic content and efficient data processing.
- Integrated backend services with internal tools and systems to improve operational efficiency and data flow.
- Collaborated with designers and stakeholders to deliver new features, resolve issues, and optimize system performance.

Skills

Teamwork & Communication	Problem Solving
CI/CD	AWS, GCP, Azure
IaC(Terraform, Ansible)	Docker
Kubernetes	Jenkins
Grafana	Bash
Powershell	Agile/Scrum
Programming Languages	Scripting Languages
Software Testing	Monitoring & Logging
Microservices	Cloud Computing
Linux	Infrastructure Automation

Education

Bachelor of Science: Computer Science, 03/2017
Texas A&M University

Certifications

HashiCorp Terraform Associate (003), 12/2025
