

Thomas Ford

Senior DevOps & Software Engineer

Date of Birth: Feb 10, 1993

Lubbock, TX 79403

(254) 262-5719

thomasford3344@gmail.com

Senior DevOps and Software Engineer with **8+ years** of experience building scalable cloud infrastructure, automating deployments, and developing reliable backend systems. Skilled in Kubernetes, GCP, Bitbucket, Jira, Python, and Java, with a strong track record of supporting intelligent, data-driven platforms like OPTRIX and contributing to next-gen cybersecurity products at RevBits. Adept at improving delivery pipelines, optimizing system performance, and collaborating across teams to deliver secure, high-quality software. Known for clear communication, fast problem-solving, and driving efficiency in fast-paced, complex environments.

Work History

DevOps Engineer

Vieaura Inc., Alpharetta, GA

- Built CI/CD pipelines in Bitbucket to support OPTRIX's Operational Intelligence, ensuring reliable, repeatable deployments.
- Managed scalable Kubernetes clusters on GCP, delivering high availability for OPTRIX's real-time spatial awareness features.
- Set up monitoring, logging, and automated deployments on GCP to support OPTRIX's adaptive Intelligent Guidance system.
- Improved workflows by refining Jira processes, automating infrastructure tasks, and standardizing environments for the OPTRIX no-code platform.

Software Engineer

RevBits LLC, Mineola, NY

- Developed security product features in Python and Java for platforms including RevBits CIP/XDR, Email Security, EDR, and Zero Trust.
- Built and optimized backend components to improve threat detection, access control, and incident response.
- Translated penetration-testing and vulnerability findings into product enhancements.
- Performed code reviews, debugging, and testing to ensure secure and reliable software.

- May 2018

Full Stack Software Developer

EBQ, Austin, TX

- Developed backend systems using Java and Python to support core website functionality and internal business workflows.
- Designed and implemented RESTful APIs and database structures for dynamic content and efficient data processing.
- Integrated backend services with internal tools and systems to improve operational efficiency and data flow.
- Collaborated with designers and stakeholders to deliver new features, resolve issues, and optimize system performance.

Education

Mar 2017

Bachelor of Engineering: Computer Science

Texas A&M University - Kingsville

Skills

Teamwork & Communication	★★★★★
Problem Solving	★★★★★
CI/CD	★★★★★
Cloud Platforms(AWS, GCP, Azure)	★★★★★
IaC(Terraform, Ansible)	★★★★★
Docker	★★★★★
Kubernetes	★★★★★
Jenkins	★★★★★
Grafana	★★★★★
Bash	★★★★★
Powershell	★★★★★
Agile/Scrum	★★★★★
Programming Languages	★★★★★
Software Testing	★★★★★
Monitoring & Logging	★★★★★
