Involgix

RE: Google Kubernetes Engine (GKE) SME / Lead Contractor

Dear Involgix Hiring Team,

I'm excited to apply for the Google Kubernetes Engine (GKE) SME / Lead Contractor role. With over eight years of experience in cloud-native engineering, Kubernetes, and platform modernization, I bring the technical depth and leadership needed to guide complex migrations and improve cloud operations.

At Vieaura, I led efforts to containerize and orchestrate services using Kubernetes, built and optimized CI/CD pipelines, and partnered with engineering teams to design secure, scalable infrastructure. I've worked hands-on with Kubernetes cluster design, networking, RBAC, automation, and observability, and I regularly mentored teams on best practices and operational standards.

I bring strong automation skills with Python, a solid understanding of cloud security and networking patterns, and experience troubleshooting distributed systems across development and production environments. I enjoy simplifying complex systems, improving reliability, and making platforms easier to operate and scale.

What attracts me to Involgix is the opportunity to lead strategic Kubernetes initiatives and deliver meaningful impact through thoughtful cloud engineering. I'd welcome the opportunity to contribute my GKE and cloud experience to your team.

Thank you for your time and consideration.

Sincerely,
Thomas Ford
